- 500-character multi-line correction memory
- 14-inch paper width
- "Gentle Impact" printing
- Three character pitches
- Color-coded automatic functions

ELECTRONIC TYPEWRITERS

MX 250

Canon helps you keep business on a professional level.

Store frequently used text for later use.
For most businesses, the typing task represents a good deal of repetition — which is why the Canon MX 250 incorporates a 6KB phrase and macro memory. This handy feature lets you cut down on work duplication by storing phrases, names, addresses and key operations that you use on a regular basis. When the time comes to use stored information, simply designate which text you want and press "RETURN" to start printing.

Spell it right every time.
Spelling exemplifies the old story: nobody notices when it's done right, but when it's done wrong — disaster. To keep bad times at bay, the MX 250 has a built-in 60,000-word spell checker that automatically alerts you of any spelling mistakes while typing. You can even customize this function with up to 300 words or names of your own. If there is a misspelling, the 500-character multi-line correction memory makes corrections exceptionally easy.

The bottom line is business.
The MX 250 has a full lineup of automatic features specially tailored to the needs of the small office. To format the page, call on automatic centering, right margin alignment and paragraph indent. Or for tables, use column layout and decimal tabs. Whatever the job might be, a smooth work flow is ensured with automatic paper feed, page end warning and carrier return. Function keys are color-coded for high visibility and easier access.

A more pleasant work environment.
The MX 250 fits right into your work place in other ways. For example, while the platen is big enough to handle paper widths up to 14 inches, the machine as a whole has a small "footprint" that leaves more desk space for you. Printouts are quiet for a pleasant work environment that's more conducive to getting business done.

Canon quality for the long haul.
Canon's daisy wheel "gentle impact" printing system — with three character pitches — gives you a high quality look for all your documents. Each character is crisp and clear to be sure, but the fact that the daisy wheel strikes the paper so lightly means that there's less wear and tear on the machine. The rest of the MX 250 is built to stand up to the rigors of doing business, too, so you can depend on it to deliver day in and day out.

SPECIFICATIONS

Printer:
- "Gentle Impact" Quality Daisy Wheel Printing
- 14-inch Paper Width
- 11-inch Typing Width
- 15 cps Print Speed
